

FACT SHEET

TOKLO IS TOUGH.

At its core, Toklo is made of stable, moisture-resistant tropical hardwoods. Toklo is built using a world-renowned InterLock locking system, for the easiest and fastest install ever and is available at unbeatable BuildDirect prices. If you want the best, look no further than Toklo.

Toklo Laminate Flooring. Seen here in Leather.

THREE GOOD REASONS TO BUY TOKLO.

Toklo is the best laminate floor on the market today. Here's why.

1. Standards. And exceeding those standards.

We build Toklo to stringent European standards. Which one exactly? Toklo complies with EN 13329, set in 2006, a standard which establishes the characteristics, requirements and classifications a laminate floor must meet and gives methods for manufacturers like BuildDirect to test against. Knowing these standards we built Toklo to exceed standards in the area of moisture resistance—one of the most vulnerable areas for any flooring.

2. A tropical hardwood core—a step above the competition.

Unlike other manufacturers, we make our high-density coreboard from hardwood, not softwood, giving it greater stability and durability. That's why we say Toklo is tough. Having hardwood as its core means your floor will look good and stay that way for longer. Toklo is made from plantation trees that are replanted regularly. Every part of the tree is used in the production of our Toklo coreboard including off-cuts, peeler core and wood slabs. Previously these pieces were disposed of, but with Toklo we're making the most of our precious resources. That way nothing is left to waste—a nice environmentally-friendly benefit for the best floor on the market.

3. Locking System with a waterproof finish.

Toklo is made using a world-renowned InterLock locking system, for the easiest and fastest install ever. To make the entire system even more durable, we've added a rock-hard wax sealant to waterproof Toklo on all 4 sides. With the locking system sealed to prevent moisture penetration, the most vulnerable part the flooring system is protected. It also prevents that squeaky noise you can find with other laminate floors that do not have waxed edges. A nice little bonus.

Plus it's made by BuildDirect.

When you buy a BuildDirect product you can be assured of the highest quality standards at the lowest price. With Toklo, we have control over the entire process from the supply of raw materials to manufacturing. That's why you get the same great quality with every piece of Toklo at prices that can't be beat.

	Roasted Hazelnut	15mm	Lifetime residential 5-yr light commercial	AC4	\$1.59/sq.ft

†AC ratings rank the level of durability of a laminate floor. AC ratings give consumers a tool to measure a laminate floor's resistance to abrasion, impact, stains and cigarette burns. There are five AC ratings between 1 and 5, with 1 denoting less resistance to wear and 5 denoting highest resistance to wear. Since Toklo is rated AC4 and above, it's suitable for both residential and commercial uses.
