

# Pedra

## COUNTERTOP SYSTEMS

### Planning Guide

- This Guide will help you determine which Pedra Modular Countertops kits you require
- Simply layout your kitchen and draw kits needed or cut out kits and place them on your drawing
- If you have any questions please contact Customer Service
- If required, additional Planning Guides can be downloaded at [www.builddirect.com](http://www.builddirect.com) from any Modular Granite Countertop page.

## Intermediate Kit A

Used in the middle of a straight run of counter to set to overall length of the run. Includes two 12", one 6", and one 3" section to allow for any length in 3" increments from 3" to 33".

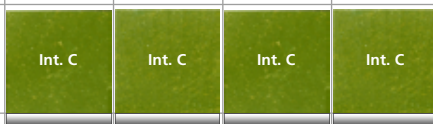

## Intermediate Kit B

The standard kit for building straight runs of countertop. Consists of two 12" sections.

## Intermediate Kit C

Consists of 4 bullnose edge tiles. Usually used in conjunction with other kits in building islands. Also used for fireplace hearths and granite stair treads.

1 square = 12"x 12" (1 sq ft)

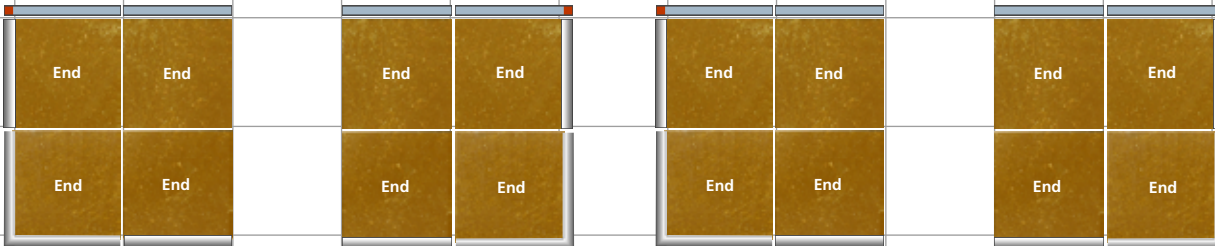

- o This sheet may be used either as a reference for drawing these sections on your countertop diagram or you may cut out the pieces and lay them on the kitchen diagram you created on the Planning Sheet
- o These countertop sections are to the same scale as the squares on the Planning Sheet. 1 square = 12"x 12"

### LEGEND

Bullnose Edge	
Backsplash	
Backsplash Corner	
Backsplash End	

## End Kit

Used at the end of a counter where the end is visible rather than terminating at a wall or appliance.  
Note: This section can be rotated 90° and used for either right hand or left hand ends.

## Inside Corner 90° Kit

This is the standard kit used for inside corners.

1 square = 12"x 12" (1 sq ft)

- o This sheet may be used either as a reference for drawing these sections on your countertop diagram or you may cut out the pieces and lay them on the kitchen diagram you created on the Planning Sheet
- o These countertop sections are to the same scale as the squares on the Planning Sheet. 1 square = 12"x 12"

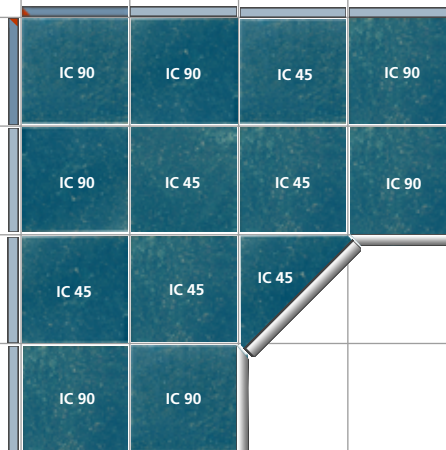

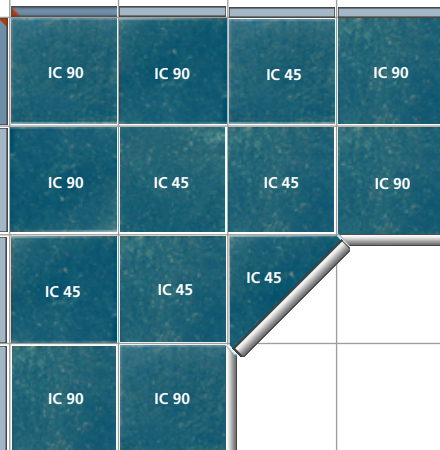

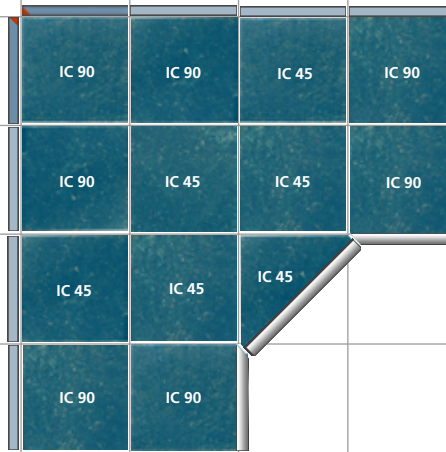

## LEGEND

- Backsplash 
- Backsplash Corner 
- Backsplash End 

## Inside Corner 45° Kit

Used in addition to an Inside Corner 90° Kit to create a corner with a 17" 45° section.

**Note:** As stated above, to complete a 45° inside corner both an Inside Corner 45° Kit and an Inside Corner 90° Kit must be used. These kits are ordered separately. In this application you will have one extra 12"x12" tile left over.

1 square = 12"x 12" (1 sq ft)

- Backsplash End

## Double Inside Corner 45°

This application requires two Inside Corner 45° Kits and an Inside Corner 90° to create a corner with a 34" 45° section. Must be used for corner sink applications.

**Note:** As stated above, to complete a double 45° inside corner two Inside Corner 45° Kits and an Inside Corner 90° Kit must be used. These kits are ordered separately. In this application you will have two extra 12"x12" tiles left over.
